2. No claims have been amended.
3. No claims have been cancelled.
4. No claims have been added.
5. Claims 1-23 are currently pending.

Authorization for this Examiner's amendment was given by Attorney Sherry Schumm during a telephone interview on February 10th, 2009. The application has been amended as proposed in the amendment received from the Attorney on February 10th, 2009.

Please see attached proposed amendment dated February 10th, 2009.

Reasons for Allowance

7. The following is an examiner's statement of reasons for allowance:

For independent claim 1, the prior art fails to show alone or in combination an apparatus for forming a Wireless Personal Area Network (WPAN) from a plurality of Personal Area Network (PAN) devices that comprises: a location determinator, a comparator to compare the location for each of the plurality of PAN devices with a WPAN association criteria, and a communication link coupled to the comparator configured to transmit, to the plurality of PAN devices that at least partially satisfy the WPAN criteria, the identification of each of the plurality of PAN devices.

The prior art over Pelaez et al. (U.S. Patent 7,142,839) in view of Aljadeff et al. (U.S. Patent 6,963,289) and Gutierrez et al. (U.S. Patent 7,349,360) teach an apparatus for forming a wireless network from a plurality of wireless devices. However, the prior art fails to teach forming the a WPAN using a WPAN criteria wherein the WPAN association criteria include one or more criteria selected from a group of criteria consisting of a PAN device of said plurality of PAN devices being located within a first spatial boundary of a predetermined size, the PAN device being located within a second spatial boundary of a predetermined shape, the PAN device being located within a third spatial boundary for a first predetermined time, the PAN device moving together with at least one other PAN device of the plurality of PAN devices substantially as a group for a second predetermined time, and the PAN device being located within a predetermined distance of a wireless element.

Independent claims 7, 12, and 17 are allowable because they are similar to claim 1. Dependent claims 2-6, 8-11, 13-16, and 18-23 are allowable because they depend on the allowed claims.
